

## **Radiomonitor launch pan-European music airplay service.**

Radiomonitor is pleased to announce the launch of a pan-European music airplay service.

Based on Radiomonitor's existing international airplay service, which has been tracking international releases for companies such as Universal Music Group since 2010, the new service will provide data and analysis tailored to a national level with a focus on both historic and newly released local repertoire.

Data will be available through the Radiomonitor website, via daily emailed reports or via a custom data feed.

The service will initially be launched in Austria, Belgium, Denmark, Finland, Germany, Holland, Ireland, Norway, Sweden and Switzerland in addition to the existing local service in the UK.

Radiomonitor will also be launching national and pan-European Airplay charts.

The latest station lists are available at <http://www.radiomonitor.com/station-list/>

### **About Radiomonitor:**

Radiomonitor is a London based company specialising in the provision of music airplay data to the music and media industries. In the UK, we are the industry standard airplay data provider, supplying data to all major record companies and broadcasters.

Clients include Universal Music, Sony Music, Warner Music, Beggars Group, Ministry of Sound, the BBC and many other broadcasters in Europe, Canada, Australasia and the Middle East.

Radiomonitor currently tracks the music played on over 2,500 stations in 21 countries.
